## **DETAILED ACTION**

This Office action is in response to the applicant's appeal brief filed on 12/9/03. Upon further consideration, the previous finality is being withdrawn and with the new art and ground of rejections are presented as follow:

# Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 29-34, and 43-48 are rejected under 35 U.S.C. 102(e) as being anticipated by Stern (US 6,542,132).

In regard to claims 29, 30, 32-34, Stern teaches tensegrity support structural members comprising at least three compression members 26 that each lie on the surface of one of at least three different planes that intersect one another, a set of at least six tension members 28 that connects each of the at least three compression members 26, and the at least three tension members of the set of six tension members are arranged in a radial configuration (see fig. 3a), and at least one tension member 6' (see attached fig. 3a) is arranged in an internal configuration.

Application/Control Number: 09/895,763

Art Unit: 3635

In regard to claim 31, Stern teaches at least four compression members 26, 28, lie on the surfaces of two different planes that intersect one another, a set of at least six tension members 28 that connects each of the at least four compression members with at least one other compression member of the at least four compression members 26, 30 (see fig. 3b), at least three tension members 28 are arranged in a radial configuration (fig. 3a) and at least one tension member 28 is arranged in a circumferential configuration (fig. 3d).

In regard to claims 43-48, Stern teaches at least four compression members 26, an outer set of at least six tension members 1-6 (see attached fig. 3a) that connects the at least four compression members with one another at outer tension member attachments, an inner set of at least four tension members 1'-4', that connects the at least four compression members 28 with one another at inner tension member attachments having polygonal faces, and arrangement an internal configuration, at least three tension members (1-6) are arranged in a radial, an internal and a circumferential configurations.

## Allowable Subject Matter

Claims 20-28, 35-38, and 49-55 are allowed.

#### Response to Arguments

Applicant's arguments with respect to claims 29-34, and 43-48 have been considered but are most in view of the new ground(s) of rejection.

#### Conclusion

Application/Control Number: 09/895,763

Art Unit: 3635

Any inquiry concerning this communication or earlier communication from the examiner should be directed to Chi Q. Nguyen whose telephone number is (703) 605-1224, Mon-Thu (7:00-5:30), Fridays off or examiner's supervisor, Carl Friedman can be reached at (703) 308-0839. The fax number for the organization where this application or proceeding assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-
